Feature Guide · Updated 29 July 2026

OVERVIEW

One app, three views

Second Skool adapts to who is signed in. The **Head** runs the centre, **Teachers** handle daily teaching, and **Students** get a clean, read-only window into their own progress — all from the same app, secured per centre.

Head Teacher

Full control of the centre.

- ✓ Approve students & staff
- ✓ Manage branches, batches & subjects
- ✓ Fees, rankings & weekly reports
- ✓ Send reminders to parents

Teacher

Everything for daily teaching.

- ✓ Mark attendance
- ✓ Enter results & assignments
- ✓ Share study material
- ✓ View timetable & students

Student

Their progress, at a glance.

- ✓ Home & timetable
- ✓ Results & rankings
- ✓ Their teachers
- ✓ Personal profile

HOW IT STARTS

Sign in & you're in the right place

Sign in with Google — no passwords to remember. New students and staff **request access**, and the Head approves them with the right class, branch, batch and fee. Each centre's data stays completely separate and private.

Google sign-in

One-tap login. Roles (Head / Teacher / Student) are assigned automatically on approval.

Request & approve

Students self-register; the Head approves and slots them into a class, branch & batch.

Run the whole centre

Daily shortcuts sit on the Home screen; everything else lives neatly in the **More** menu. Here's the full toolkit.

Attendance

Mark present / absent in seconds. Absentees feed straight into reminders.

Results

Enter marks per subject; they roll up into rankings and the student view.

Assignments

Set homework and track what's pending for each class.

Study material

Share notes & resources students can open any time.

Reminders NEW

5 message types to parents — Notice, Fees, Homework, Test, Absence.

Fees & alerts NEW

See collected vs remaining totals plus every student's amount due.

Rankings

Auto-ranked leaderboard from results — motivates students.

Meetings

Schedule parent-teacher meetings and keep everyone in sync.

Branches NEW

Multiple locations, each with a live student roster you can expand.

Batches NEW

Head-created batch groups with tap-to-open student rosters.

Subjects

Define the subjects taught — used across results & timetable.

Weekly report

A quick snapshot of the week's activity across the centre.

Staff access

Approve teachers and control who can do what.

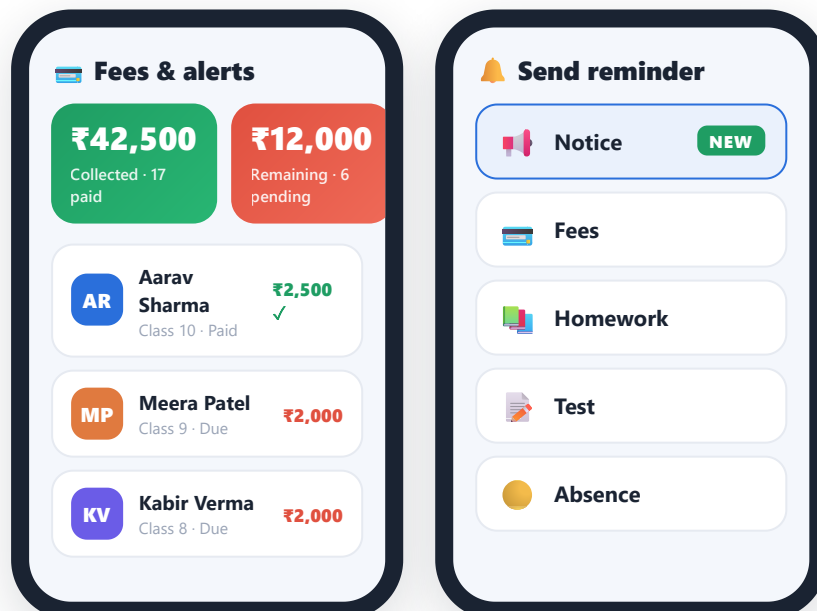

Timetable

Today's classes with time, subject, class & room at a glance.

Latest upgrades

The most recent round of improvements — all live in the app now.

- Batches with rosters**
 Heads can create batches in **More** → **Batches**. Each batch shows a live student count and taps open to reveal every student in it — with class, school & fee status.
- Branch rosters**
 Branch cards now expand to show exactly who studies at each location, with an always-accurate live count instead of a stale number.
- Smarter fees screen**
 Two clear totals at the top — **Collected** and **Remaining** in ₹ — plus each student's own paid / due amount on their row.
- More reminder types**
 Added a **Notice** broadcast, joining Fees, Homework, Test and Absence — five ready-to-send parent messages over WhatsApp & push.
- Full class range on Add Student**
 The Standard dropdown now offers **Class 1 to 12** (not just senior classes), and you can assign a batch right when adding or approving a student.

Sample screens — real data comes from your centre.

A clean window into progress

Students get their own simple 5-tab app — no clutter, no edit buttons, just what matters to them.

Home

Timetable & today at a glance.

Results

Marks across every subject.

Ranking

Where they stand in class.

Teachers

Who teaches them.

Profile

Their details & centre.

Alerts

Reminders land as push.

UNDER THE HOOD

Fast, secure & installable

Modern tech that keeps each centre's data private and works like a native app on any phone.

Progressive Web App

- Install to the home screen — no app store
- Push notifications for reminders
- Works great on mobile & desktop

Private by centre

- Every centre's data is fully isolated
- Row-level security on all records
- Head-only controls locked down

Built to be quick

- Next.js & React — instant screen loads
- Optimistic updates feel real-time
- Supabase cloud database & auth

Parent-friendly

- Reminders go out over WhatsApp
- Rupee (₹) fees throughout
- Plain-language messages ready to send

One app for the entire centre.

Students, staff, attendance, fees, reminders & rankings — sorted.
